

An Easier, Less Costly, More Flexible Desktop Solution? Let Siwel Prove It!

VMware View™ provides end users with access to a complete desktop environment via virtual machines hosted in your secure data center. The Virtual Desktop systems are functionally equivalent to traditional PCs, including an individual operating system, unmodified standard desktop applications and access to network resources. VMware View provides each end user with a consistent, individualized desktop with access to vital network resources and empowers administrators with robust provisioning and management capabilities.

For a limited time, Siwel Consulting is offering an Accelerated VMware Proof-of-Concept Bundle, to allow you to experience first-hand all the advantages of VMware at a low introductory price - starting at just \$8,000.

This all-inclusive bundle provides all the software, hardware, implementation and training you need to ensure a successful VMware View deployment.

Software and Hardware

VMware View 4 Premier Kit licensed for ten (10) Desktop Virtual Machines:

- VMware vSphere 4 for Desktops
- VMware View Manager 4
- VMware vCenter Foundation, (limited to 3 hosts)
- VMware View Composer**
- VMware ThinApp**
- 3-Year Platinum Support, (24 x 7)

Five (5) Wyse V10L Thin Clients

- 128 MB Flash Memory
- 256 MB Standard Memory
- 3-Year Software Maintenance

** Only included with the Premier Bundle

Choose the bundle that's right for your environment:

Products and Services	Enterprise Bundle	Premier Bundle
VMware View Manager	x	x
VMware vSphere 4 for Desktops	x	x
vCenter Foundation	x	x
VMware View Composer		x
VMware ThinApp		x
Offline Desktop		x
5 Wyse V10L Thin	x	x
Professional Services	2 days on-site	4 days on-site
Bundled Price:	\$8,000	\$14,000

Note: The Premier Bundle includes Offline VDI as well as additional application virtualization options.

Implementation and Training

Installation of vSphere for Desktops and View Manager in your lab / test environment

Configuration of vSphere and VMware View in your lab / test environment, including:

- View Manager
- vSphere infrastructure configuration
- Deployment of desktop images from templates
- Integration of VMware View with Active Directory & VMware vCenter
- Define and implement user access to VMware View sessions

Installation and configuration of the following:

- View Composer**
- ThinApp** Note: ThinApp implementation is limited to configuration of up to three (3) standardized, pre-packaged applications

Knowledge transfer for deployment of Best Practices, session access, policy-based connection brokering, session management and VMware View monitoring.

Training on advanced software options, including View Composer and ThinApp.

** Only included with the Premier Bundle.
